276 DAYS PAST

90 TO COME

Rachitis.

Pituitary extract given to 16 young children with rickets, and effects compared with controls. After a few weeks of pituitary, the children were able to stand and began to walk; fontanelles began to close and growth of teeth was considerably accelerated. Osseous tenderness gradually diminished, weight was gained, and musculature became firmer.—Weiss.

Weather

Temp.

A fine day

Girls Road to School on wheels  
Florence & Less were here  
for tea, are going home  
tomorrow. John & I went  
to Kingsmill got a sack  
of sugar & some under  
ware. This afternoon  
John was digging  
potatoes.
