Surgical Suggestions.

Chronic ulcers of the face situated in the area between lines drawn from the outer end of the eyebrow and the upper border of the ear above, and the angle of the mouth and the lobe of the ear below, are usually epitheliomata of the basal-celled variety and they are comparatively non-malignant.—*Amer. Journ. of Surg.*

Weather

Temp.

Rained last night & off this morning & again to night. It turned colder & night with quite a high wind & raining. Grandie & Grace went to school, Boyde was here for dinner, she was up to the place. This afternoon Ed & Boyde have been cleaning up that timothy seed in the driven barn, John helped Guy take the milk & this afternoon he helped the boy take a load of oats.
