

I went over with him and we got enough for tea.

After tea I cut a little lawn till it got dark.

I would have been hot to-day if there had not been such a cool breeze.

Dick and Bill went down town after tea and Dick got our new strained frail which Hugh has been making for the last two or three days.

Friday June 16th

Bill started to plow this morning when we hauled out the manure.

I cut up some wood and then went back to hoe corn while Daddy went over to Sol. Smith's to see when if it best could come to move the barn. He said he would come to-night and move it to-morrow, so Daddy ran around to see if he could get men to help him and he got four or five.

When he came back I cut a lot more wood to cook the meals with and Daddy went back and hoed corn till noon.

After dinner Daddy and I hooked up Ginger and Joe to the wagon and took Wepser's cultivator (which we are not done with) and Fleming's chain back to the owners. When we came back and hauled posts from the corn and wheat fields which were in the old long fence. We thought the would do to block up the building with. We stayed at this job till half past four. While we were at it Ches. Robinson came after a setting of eggs.

We went down town after this to get a supply of provisions. Cnah went with us and we got Hubby and all the men he can get to come over to-morrow. Daddy and Dick went over to Blake's to get something hen to eat or some duck. Eggs that he gave us this morning.
