129 DAYS PAST

237 TO COME

Dr. José D. Fernandes, Havana, Cuba, May 31, 1907.

"For some time I have been prescribing your preparation,

**Pepto-Mangan (Gude)**, in cases of anemia, and for various causes. In all of these cases I have noted its markedly favorable influence as a great regenerator of the blood, as an excellent tonic, and as an indescribable necessity for convalescents after grave illness.

I also desire to congratulate you on your preparation, which not only is easily assimilated, but also rapidly increases the red corpuscles of the blood, stimulates the appetite without causing gastro-intestinal troubles, and is of an agreeable taste."

Cold & cloudy rained off  
& on. John went with Shiel  
& Albert fishing this afternoon  
they got three. I ironed. Gaudie  
went to school. Charley Marchant  
& Jessie's family was out to  
right & got a setting of eggs  
& brought me a calf heart &  
tongue. Melba has been around  
nearly all day
