

and put on a five cent toll for talking through different
centres, so nearly all the rural subscribers refused
to pay and their phones have been taken out, and the
subscribers are meeting this after noon. I shocked up
as long as Bill was cutting and then came up and
did chores till noon. Dad went back this morning
and rolled about half the field and started to harrow
this after noon he took four bags of seed and the drill
back and put that much in I harrowed what was
rolled and then rolled a little more. Had thought
by getting that much in we could easily finish Monday.
There has been a very high cold west wind all day.

Sunday October 2nd

Mary, Jim & I went down to Sunday school and then
to church. Dad & Cuck drove down and drove Aunt
up to church. Aunt and Aunt Alice came over here
after church Aunt drove over with Dad & Cuck & Aunt
Alice walked with Mary & me. Sid went around and
got Stubby and brought him over to dinner. We
just sat around and visited all the after noon and
Aunt Alice, Mary and I went and gathered up some

hickory nuts. Stubby had to go home early but Aunt
Alice stayed to tea and went down with the
Dawells when they come after Cuck to take her to
church. Mary and I spent most of the evening
looking at house plans as we are thinking of
building one next Spring out under the hickory
nut tree. Feels very much like Fall, high wind & cool.

Monday October 3rd

It rained a little this morning and threatened more
so we were late getting back. I took the rest of the
seed back and then finished rolling the field
this after noon. I put on a jag of wood this morning
and brought it up at noon. Dad drilled nearly all
day but could not quite finish the field as he ran
out of seed. It will take about a bag and a half to
finish the field and sow the head lands. Mary
went down to Aunt's parlor to-night and went
to the girls meeting after work. I walked down after
tea and went up to a Mr. Cornish about the Linn
Boys. He has never had any thing to do with
them but said he would help me any way he could.
