68 DAYS PAST

FRIDAY

298 TO COME

The Early Recognition of Cancer.

CARCINOMA OF THE STOMACH. When a person of middle age, whose stomach and bowels have always been normal, suddenly begins to complain of loss of appetite, a sense of pressure and light pain in the gastric region, nausea accompanied by constipation alternating with diarrhea, headache and general fatigue, the possibility of a beginning malignancy should be considered, and a complete diagnostic gastric analysis procured.—Levin; Archives of Diagnosis.

Weather

Lovely day thawed

Temp.

Bees were out some John
drew manure. Boyce tapped
twenty trees. Girls went to
school. To night the girls &
I went to Kingmill, to the
debate, didn't get home
until nearly twelve.
