

which was more than we could stand. but there
 was another roan or about seven months old when
 he only asked \$10000 for it. We didn't like him quite so
 well and his mother didn't give a very big milk
 record but as all of his ^{Cook's} stock is of such pure
 English breeding having come from the Rother child stock
 and been bred for generations we thought he
 might make a great impression on our stock and
 be a good foundation to build upon. However we
 didn't buy him but thought we would ask Dad
 about it and let him know later. We got home at
 two o'clock by our time. The time of the country is
 in a beautiful mix up now. The house didn't record
 the Daylight Saving law because the farmers make
 such a howl about it last year. but the rail ways
 all adopted new time on the first of April claiming
 that as they had it on the other side it would cause
 no end of confusion and probably accidents at the
 boarder if they didn't have the same time as the American
 roads. The consequence is a muddle and no one
 is any better off and most people are madder than
 ever at the farmers and in their particular case I

don't think any one can blame them. When we got up to
 Auntie's we found Ray there he had come on the car before
 we did. Old Phelix was here putting the little pump
 he made for the well at the wind mill in at the
 house. well as the old chain there is just about
 rusted out. It looks queer there in place of the old
 bucket and chain well and reminds me of one of these
 walking sticks we find in the woods. Guy Temple
 came after Dad soon after we got home so we kept
 Phelix while Dad went over there. I went down town
 to night and went with Marj & Miss Martin to the
 Presbyterian show in the hall. It was a bunch of middle
 aged women from Simcoe putting on for the Suffragette Convention
 and I think was the poorest excuse for an entertainment
 that it has ever been my misfortune to attend. Will cloudy

Saturday April 5th

I went down to Uncle Ward's this morning and borrowed
 a couple of setting hens from him and put them up over
 the hog pen and to night put some eggs under them from
 the incubator so that they will be prepared to look after the
 chickens when they come out. When I come back
