

The Time-Tried Tonic

As the years fly by, scores of new and untried remedies are introduced, most of which are ultimately cast into the therapeutic scrap heap of oblivion.

As "time tries all things," the preparation that steadily increases in professional favor, for more than 20 years, must possess merit, and stand out as an example of "the survival of the fittest."

Pepto-Mangan ("Gude")

is such a remedy. The medical profession, throughout the civilized world, continues to prescribe it, in steadily increasing quantities, in Anemic, Chlorotic and Marasmic conditions, and whenever a dependable tonic and blood builder is required.

In 11 oz. bottles only.

Never sold in bulk.
