

December Saturday 18

1926

Lloyd Ross and Art Wilson were with me on the milk route so I was home in pretty good time even if I didn't get a very early start. Alex went to town at night but the rest of us stayed home and went to roost early.

Sunday 19

Home from milk route in good time, got ready, had my dinner and drove up to see Jean had a pleasant hike down to the house over the hill together but couldn't get in. Got weighed when we came back then later I helped Jean milk and it was then I agreed to work for Mr. Bayley and heard the conditions when I had a short talk with him. Had a water-kent rapier hour for a while then we drove up home for a while even if it was snowing quite hard. A wonderful and a happy day for me.

Monday 20

up in good time but didn't get home very early as I had a real busy day on the milk route. Told Alex I was going to quit paddling milk also when and why. Addressed some Christmas cards at night and retired at 10 P.M.

December Tuesday 21

1926

A dandy bright mild day. Clarence Lee moved here with his outfit right after dinner and started cutting the straw stack and blowing it into the barn. Rover cut my hair after we put the horses to bed so it was ten bells when I hit the hay.

Wednesday 22

Straw cutters were at Bendmere all day so that it was a busy one for everybody. Alex got hit on the head with the pipes when they fell and it nearly knocked him out.

Thursday 23

Finished washing my bottles early in afternoon then drove up to help Jean milk and had tea there. After we had washed the dishes Dollie took Lou Jean, and I to the Canning Tomas Concert which was great. Santa Claus presented me with a mysterious parcel. Also received four Xmas boxes on the milk route.
