16 DAYS PAST WEDNESDAY 350 TO COME

The Heart in Syphilis—No. 1.

Serious involvement of the heart is frequent in syphilis. Epicardium, endocardium, or myocardium, or all together, may be so diseased.

Cardiac involvement may develop early in the infection, though its symptoms may not be apparent until late.—Harlowe Brooks; *Am. J. Med. Sc.*

Weather

Blustery but not so

Temp.

very cold, ~~some snow~~, but not much snow, John has been over to Marks visiting & to night he is down to shed's. Maudie & I took the carpet up off the kitchen bed room as the snow leaked down & got the carpet all wet so had to take it up & we put the little three quarter bed in there & Maudie has been cleaning house all day. a little black dog came from Aylmer with Mr. L. this afternoon
Billy & Mike &
